[YES, I WANT TO TRUST MY MEMORY AGAIN - \$149]

Over 2500 brains have trusted us to improve their memory across the world

[LOGO STRIP: Google, Barclays, Mastercard, WeWork, Ernst & Young, NHS, Royal Air Force, Lego, Tesco, Lloyds Bank, BAE Systems, Cisco, UK Government]

- **Featured in The Telegraph**
- **CPD Accredited Provider #13185**
- **Bloomberg Certified**
- **Over 2,500 professionals trained across Fortune 500 companies, government agencies, and healthcare systems.**
- **Founded by Queen Mary University Neuroscience Graduate & Italian National TV Memory Champion**

Over 2,500 professionals trained across Fortune 500 companies, government agencies, and healthcare systems.

And this message is especially for you if you feel like...

...you keep saying "my memory isn't what it used to be" but secretly worry it's much worse

...you laugh off "senior moments" while privately counting how often they happen

...you tell everyone "it's just normal aging" but wonder if this is how it begins...

Because Too Many People Believe That You Can't Improve Your Memory After 50 Years Old – So We Made Our Life Mission To Break That Lie Forever...

You remember having a better memory when you were younger. Phone numbers stuck in your head. Conversations were easier to follow.

So what changed over the years?

...Does your brain just break as you age...?

The truth is...

After working with thousands of people just like you over the past 20 years – we can confidently say that:

Your memory isn't failing. And you're not having dementia.

Family dynamics, financial obligations, and life experiences didn't exist when you were 25 to fill up your brain.

Your brain just got more complex, and **nobody** told you how to adapt your memory system.

You just need a better memory system. Not a new brain.

So this is why we created Memory Reloaded tailored to you...

A simple 21-day course that anyone can follow to give them the tools they need to regain their memory confidence and feel mentally sharp again.

[ADD A MASHUP OF TESTIMONIALS MENTIONING HOW LOVEBRAIN CHANGED THEIR LIFE FOR THE BETTER]

Mary Always Thought She Had A "Faulty Memory" – Until She Used Memory Reloaded To Never Confuse People's Names Again...

<https://vimeo.com/wearesuperbrain/review/855857224/5d6e740ad3>

"It was the most incredible exercise and I will never, ever forget that exercise in my life [...]. It's life changing and it's actually really cheap for what you get."

Asuncion Claims "My Work, My Relationships And Confidence Have Improved Drastically"

<https://vimeo.com/wearesuperbrain/review/855858193/05d3897a5a>

"You don't have to take my word for it, just do it yourself, and you will be surprised as well."

Meet the Founders Who Proved Memory Can Improve with Age

[IMAGE OF MOUSUF] Mousuf - The Man on a Mission Mousuf watched his father's mental decline from old age and illness - forgetting family members, losing conversations, and becoming a shadow of the man he once was. That devastating loss sparked his mission with protecting and enhancing brain health. Mousuf holds a degree in Neuroscience and Psychology from Queen Mary University and has built educational companies serving thousands of people. He's spent two decades studying cognitive decline and neuroplasticity research. Proving that mental decline isn't inevitable - memory can actually improve with age when you train it properly.	[IMAGE OF FRANCESCA] Francesca Dal Corso - Living Proof It Works At 10, Francesca couldn't remember a single line of a script for a TV appearance, even with her teacher's help. Yet, by 22, doctors diagnosed her with severe ADHD - a condition that supposedly makes memory and focus nearly impossible. Yet at 22, she memorized 36 motorcycle license plate numbers in 30 minutes on Italian national television, watched by millions. Journalists compared her performance to Guinness World Record holders. 14 years of training over 2,500 brains across Italy, the US, and UK taught her this: The people labeled as "hopeless cases" often achieve the most dramatic results when given the right methods.
---	---

And During Our 30+ Years Of Combined Experience Helping People With Their Memory – Too Many People Simply “Gave Up” On Themselves...

After working with 2,500 brains across four countries, we discovered something that broke our hearts.

The smartest people we met had given up.

Doctors told them memory decline was "normal aging."

Friends said "happens to everyone."

And some even thought that the first signs of dementia started to creep in.

So they stopped trying. Started avoiding social events. Wrote everything down. Lived smaller lives.

But here's what nobody told them:

The real reason you had "better memory" at 20?

School forced you to memorize daily. You were constantly training that mental muscle.

Now at 50, 60, 70, or 80... school ended decades ago.

You stopped training. Meanwhile, your life exploded with complexity.

You're trying to handle adult-level information with student-level techniques.

Memory is a skill.

Like driving or riding a bicycle. It gets better with the right training.

So We're Breaking These Myths With A Simple 4-Stage System ANYONE Can Follow To Feel Mentally Sharp As Their 30-Year-Old Self...

That's why we created Memory Reloaded – the first system that works WITH your mature brain's sophisticated neural networks, not against them:

Our Memory Reloaded Method targets the 4 stages where information gets lost:

- **Stage 1 - Encoding:** Why information bounces off your brain instead of sticking
- **Stage 2 - Consolidation:** How to move important details from temporary to permanent storage
- **Stage 3 - Retrieval:** The triggers that instantly bring information back when you need it
- **Stage 4 - Application:** Using your personal learning style (VASE) to customize everything

This isn't party tricks or brain games to impress your family or friends.

These are proven memory techniques backed by 34 years of cognitive science research and validated by over 2,400 students worldwide...

Which is why grandparents who once feared becoming a burden now remember details their adult children forget.

4.7/5 stars reviews

[FEEL MENTALLY SHARP AS MY 30-YEAR-OLD SELF]

Over 2500 brains have trusted us to improve their memory across the world

But We Know What You're Probably Thinking Right Now...

"This sounds too good to be true. My memory really is just bad."

"I've tried everything and nothing works for me."

"Maybe I'm just too old for this."

We understand these doubts.

Because before we discovered this method, we believed the same lies that everyone else believes about memory and aging.

Do You Currently Believe In Any Of These 4 Lies...?

Lie #1: "My Memory is Too Far Gone To Improve"

Your memory is perfect. You're just using the wrong system. Harvard found 95% of adults use only 1 of 3 memory pathways.

Our students who thought they were having "signs of dementia" went from remembering 3 words to 15 words in minutes.

Same brain. Just a better memory system.

Lie #2: "Memory Gets Worse with Age"

Mayo Clinic proved the opposite. Memory capacity grows after 50 when you build the right connections.

The "decline" happens because you're still using elementary school techniques on an adult brain.

Lie #3: "Smart People Remember Better"

Intelligence has zero connection to memory.

Our ADHD students outperform Mensa members. PhD or high school dropout -- same techniques work for everyone. (Lots of Memory Champions have been proven to have average IQ)

Lie #4: "Memory Training Takes Forever"

97% of our students see dramatic results by Day 3 of this training.

No lifestyle changes.

No complicated exercises.

Just techniques you use immediately.

Here's What You're Going To Discover In The Next 21 Days...

Day 1: Proof Your Brain Works Perfectly

- Learn why your current system creates forgetting
- Master our core encoding technique
- Experience immediate improvement in recall ability
- Instant proof you're not broken

Days 2-3: How Memory Really Works

- Discover why information gets stuck
- Master the technique memory champions use
- Practice with images that match your brain

Days 4-7: Make It Stick

- Learn your personal learning style
- Create associations that work automatically
- Customize techniques for your specific brain

Days 8-21: Real Life Application

- Use on names, faces, speeches, procedures
- Daily exercises that fit your routine
- Final test - remember complex information that seemed impossible 21 days ago

"This Sounds Hard"

If you can follow a recipe or remember a TV show plot, you can do this.

Because there are...

✗ **No complicated theories** - You'll never need to understand brain science to use these techniques

✗ **No difficult mental gymnastics** - These work with how your mind naturally thinks

✗ **No apps or technology** - Everything comes in simple daily emails you can print if needed

✗ **No disrupting your routine** - Practice while doing things you already do

We built this specifically for people like you...

You're busy. You've tried things that didn't work. And you don't have weeks to waste before seeing results.

✓ **Master the core method in minutes** - Simple enough to start using immediately

✓ **Practice on your real life** - Use the names, conversations, and situations you face daily

✓ **See improvement instantly** - Each day is aimed to bring immediate results

✓ **Built for your brain** - Designed for how experienced minds actually process information

[UPGRADE MY MEMORY SYSTEM FOR \$147]

Over 2500 brains have trusted us to improve their memory across the world

And Today We're Still Shocked About What's Out There On The Market About "Memory Training"

Brain Training Apps Promise Too Much, Deliver Too Little

Traditional brain training apps train you to get better at... playing their games. The skills don't transfer to remembering names at parties or recalling important conversations. You waste months getting better at digital puzzles while your real-world memory stays frustrating.

Memory Supplements: Expensive Hope in a Bottle

You've probably spent hundreds on pills promising "brain support." But Harvard research shows these supplements provide minimal cognitive benefit. Meanwhile, you keep forgetting where you put your keys, convinced you're "doing something" when you're just funding false hope.

Traditional Memory Methods: Built for a Different Era

Most memory courses teach techniques from the 1970s - before scientists understood how mature brains actually process information. They give you generic "memory palace" methods that ignore how YOUR specific brain learns best. You get theory. Your memory problems stay the same.

Memory Reloaded is the only system built specifically for sophisticated adults who need real results in the real world.

Our Students Didn't Believe They Could've Improved Much At First... But It Only Took A Few Days To Change Their Minds...

Norma Didn't Think Much Of The Course At First – But Then She Doubled Her Reading Speed And Her Memory

<https://vimeo.com/wearesuperbrain/review/855864171/d372e2a80b>

"I have to say that I was a bit skeptical at first and the reviews were excellent. [...] And I'm very glad that I did take the course."

Teddy Claims "What I Got From The Four Days Was Way Beyond Anything I could Have Imagined"

<https://vimeo.com/wearesuperbrain/review/856623946/8f4ba22f93>

"I want the best for myself for long term, and I've gained so much from love, brain, and incredible community, incredible people, incredible inspiration, and the willingness to learn new things"

Over 1,000 five-star reviews. 97% success rate.

Here's Everything You Get When You Transform Your Memory Today:

THE COMPLETE MEMORY RELOADED SYSTEM (\$497 VALUE)

The full 21-day transformation system that took 20 years of neuroscience research to develop. The same method our oldest student (85) used to outperform people half her age. Every daily lesson, every technique, every breakthrough - all designed specifically for how your mature brain actually processes information.

+ BONUS #1: The Italian TV Memory Secrets (\$297 VALUE)

The exact techniques Francesca used to memorize 36 license plates in 2.5 minutes on live television, watched by millions. These are the advanced memory champion methods that shocked journalists and had them comparing her to Guinness World Record holders. Now adapted for everyday situations you actually face.

+ BONUS #2: The Harvard 3-Pathway Method (\$197 VALUE)

The neuroscience breakthrough that proves 95% of adults only use 1 of 3 memory pathways. This bonus shows you how to activate all three simultaneously - the secret behind why our "hopeless case" students often see the most dramatic improvements.

+ BONUS #3: Your Personal VASE Learning Profile (\$147 VALUE)

Discover your unique learning style (Visual, Auditory, Sensory, or Emotional) and get customized memory techniques that work with YOUR specific brain. Stop trying one-size-fits-all approaches that ignore how you actually think and remember.

+ BONUS #4: Memory Rescue Emergency Kit (\$97 VALUE)

What to do when you blank out mid-conversation, forget someone's name at a party, or can't remember where you put something important. Instant recovery techniques that turn embarrassing moments into confident interactions.

+ BONUS #5: The Queen Mary University Method (\$197 VALUE)

The advanced neuroscience techniques Yousuf learned during his degree at Queen Mary University. These are the cutting-edge methods used by Fortune 500 companies and NHS doctors - now simplified for everyday use.

+ BONUS #6: Lifetime Memory Mastery Support (\$147 VALUE)

Direct access to our memory experts, monthly group calls with Yousuf and Francesca, and our private community of 2,500+ successful students. Never feel stuck or alone on your memory journey.

TOTAL VALUE: \$1,579

YOUR INVESTMENT TODAY: Only \$147

That's a savings of \$1,432 - over 90% off!

You're Probably Wondering:

"What's The Catch? Why So Affordable?"

Most "memory experts" charge \$1,500-\$5,000 for weekend seminars that teach outdated techniques from the 1970s.

Neurologists charge \$400+ per consultation just to tell you "memory decline is normal aging" and send you home.

Memory clinics charge \$250+ per session for basic exercises that don't work in real-world situations.

Brain supplement companies charge \$80+ per month for pills that Harvard research proves do practically nothing.

We could easily charge \$497 for this system (and honestly, that would still be a bargain considering the 20 years of research behind it).

But here's why we don't...

We'd rather have 1,000 people succeed with our method than 50 people pay premium prices and *maybe* get results.

Because when you transform your memory and regain your confidence, you become our best advertisement.

You tell your friends. Your family notices the change. Word spreads naturally.

That's worth more to us than short-term profit.

What's Poor Memory Really Costing You?

Your investment: \$147 once

But doing nothing? It could mean...

- Missed career opportunities from forgetting key details
- Declining social invitations due to embarrassment
- \$2,000+ on doctors and supplements that don't work
- The daily anxiety of not trusting your own mind

\$147 isn't the cost of this program.

It's the cheapest insurance policy you'll ever buy for your confidence.

Because the people who invest in Memory Reloaded don't just get their money back...

They get their entire life back.

Unlike those other expenses that you pay again and again with no guarantee...

This is a one-time investment that gives you the skills to trust your memory for the rest of your life.

No monthly subscriptions. No recurring fees. No hoping things will get better on their own.

Just 21 days from now, you'll have the tools to remember names, faces, and conversations better than you did at 30.

And If You Don't Agree You're Getting A Noticeable Boost In Your Memory During Those 21-Days – We Refund You Every Penny...

Try Memory Reloaded for a full 30 days.

Use every technique. Complete every lesson. Apply the methods to your real life.

If you don't feel dramatically more confident about your memory...

... if you're not amazed by your own improvement...

And if this doesn't exceed your expectations in every way...

Simply email us and we'll refund every single penny.

No questions asked. No forms to fill out. No hoops to jump through.

We'll even let you keep the bonuses as our way of apologizing for wasting your time.

Why can we make such a bold guarantee?

Because after working with 2,500+ people just like you, we know this works.

The only risk is continuing to live with memory frustration when the solution is right in front of you.

Your Sharp Memory Starts Now

Two choices:

Keep accepting "senior moments" - spend the next 20 years forgetting names, struggling with information, watching your world shrink...

Or take control -- and 21 days from now, amaze yourself and everyone around you with memory that works better than it did 20 years ago.

4.7/5 stars reviews

[YES, I WANT TO TRUST MY MEMORY AGAIN - \$149]

Over 2500 brains have trusted us to improve their memory across the world

Your confident future is waiting. Ready to claim it?

Only 5 Minutes Per Day Of Training To Reclaim The Memory of Your Youth...

After two decades of research and thousands of success stories, we know this for certain:

You don't have to accept what doctors told you about aging.

You don't have to live with anxiety about every forgotten name.

You don't have to resign yourself to a smaller world.

Your brain works perfectly. You're not broken. You're definitely not too old.

But you must decide now.

The people who think they're "too far gone" often see the most dramatic improvements. Because they have the motivation that creates real change.

4.7/5 stars reviews

[GET THE MEMORY I DESERVE]

Over 2500 brains have trusted us to improve their memory across the world

Frequently Asked Questions:

"I'm 67 years old. Am I too old for this to work?"

Absolutely not! Our oldest successful stud

ent was 85 years old and achieved remarkable results. In fact, people who think they're "too far gone" often see the most dramatic improvements because they're highly motivated.

You just need the right system to access them.

"How is this different from brain training apps or memory supplements I've tried?"

Brain training apps only make you better at playing games - the skills don't transfer to real life. Memory supplements provide minimal cognitive benefit according to Harvard research.

Memory Reloaded teaches you actual techniques used by memory champions and backed by neuroscience research. Instead of playing digital puzzles, you'll practice on real situations - remembering names at parties, following conversations, recalling where you put things.

"I'm not tech-savvy. Is this complicated?"

Not at all! Everything comes in simple daily emails you can even print if you prefer. No apps, no logins, no technology required.

If you can read an email, you can do this program. We designed it specifically for people who want results without digital complexity.

"How much time does this actually take?"

Just 5 minutes per day. You can practice while doing things you already do - like reviewing names before a social event or applying the techniques while reading. 97% of our students see results by Day 3, so you won't be investing months before seeing improvement.

"What if I have ADHD or other learning difficulties?"

Our co-founder Francesca has severe ADHD and went from forgetting everything to memorizing 36 license plates in 2.5 minutes on national TV. 23% of our successful students have learning difficulties including ADHD, ADD, and dyslexia.

The techniques actually work better for people with these conditions because they naturally think more creatively.

"I've tried other memory courses that didn't work. Why will this be different?"

Most memory courses teach outdated techniques from the 1970s designed for young students. Memory Reloaded is the first system built specifically for mature brains (50+) using modern neuroscience research.

We work WITH your sophisticated neural networks, not against them. Plus, we offer a 30-day money-back guarantee - if it doesn't work, you get every penny back.

"How quickly will I see results?"

97% of our students see dramatic results by Day 3. On Day 1, you'll prove your memory works perfectly with our 15-word technique. Many people notice improvement immediately after the first lesson.

Full transformation happens over 21 days, but you'll start feeling more confident about your memory within the first week.

"What if I can't remember to do the daily exercises?"

The irony isn't lost on us! That's why we send you daily emails with everything you need. Just open the email and follow along.

No need to remember what to do or when to do it. Plus, the exercises are designed to be memorable and enjoyable - you'll actually look forward to them.

"Is there a money-back guarantee?"

Yes, absolutely. Try the entire program for 30 days. If you don't feel more confident and mentally sharp, we'll refund every penny.

No questions, no forms, no hassle. We can make this promise because the system works for thousands of people just like you.

"I have serious memory concerns. Should I see a doctor instead?"

If you have medical concerns, definitely consult your healthcare provider. However, many of our students were told by doctors that memory decline was "normal aging" and there was nothing they could do.

Our methods work for healthy adults who want to optimize their memory performance. Many healthcare professionals have taken our program to improve their own cognitive abilities.

"What exactly do I get for \$147?"

You get 21 days of daily email lessons with the complete Memory Reloaded system, including the Italian TV technique, the 3-pathway method, your personal VASE learning profile, real-life application exercises, and lifetime access to all materials.

Compare that to one therapy session (\$150+) or monthly brain pills (\$50+ that don't work). It's less than \$7 per day for a skill that will benefit you for life.

"Will this help with specific issues like remembering names and faces?"

Absolutely! The program specifically covers remembering names and faces, following conversations, recalling where you put things, and all the real-world memory challenges people face.

You'll practice on actual situations you encounter daily, not abstract exercises that don't transfer to real life.

"Do I need any special skills or background?"

None whatsoever. If you can follow a recipe or remember a TV show plot, you can do this. The techniques work with how your mind naturally thinks - no complicated theories or mental gymnastics required. We've had success with everyone from PhD professors to people who left school at 16.

"What if I don't see results in 21 days?"

First, 97% of people see results by Day 3, so this is extremely rare. Second, you have 30 days to try everything, so you have extra time

beyond the 21-day program. Third, if for any reason you're not satisfied, we offer a complete money-back guarantee. But honestly, after 20 years and 2,500+ successful students, we're confident you'll be amazed by your results.

Still have questions? Email us at [support email] and we'll get back to you within 24 hours.
